SHRIKANT PATIL

Director – Quality Engineering | AI-Driven Testing & Automation | Generative AI (RAG, LLM Validation)

+91 9158238007 shrikant007@hotmail.com linkedin.com/in/shrikant-patil-tech/ Mumbai, MH

Profile Summary

- Senior Quality Engineering leader with 13+ years of experience enabling large-scale quality transformation within complex enterprise ecosystems, with strong focus on high-volume financial platforms and mission-critical reporting systems.
- Expertise in applying **Generative AI and advanced AI/ML techniques** to reimagine software validation, including LLM evaluation, hallucination detection, prompt engineering & intelligent decisioning models for next-generation quality assurance.
- Proven capability in architecting **scalable automation ecosystems** that unify UI, API, and data layers, driving consistency, traceability, and measurable improvements in validation efficiency across distributed systems.
- Strong command over **microservices-based engineering and modern application stacks**, leveraging technologies such as FastAPI, Spring Boot, and React to build extensible validation and processing solutions.
- Track record of advancing **engineering maturity through DevOps enablement & modern delivery practices**, strengthening system reliability, optimizing release throughput & embedding quality as a core pillar of SDLC.

Core Competencies

QA Leadership & Strategy	End-to-End Test Planning and Execution
AI-Driven Test Automation	Defect Prevention & Quality Governance
Generative AI in Testing	Engineering Leadership & Global Team Management
Test Automation Framework Development	Stakeholder & Client Engagement
Continuous Testing & CI/CD Integration	Agile Delivery, Release Governance & Kanban Workflows

Technical Skills

- **Languages & Frameworks:** Java, Python, JavaScript, Spring Boot, FastAPI, React, Cucumber (BDD)
- **AI & ML:** Generative AI, RAG Pipelines, Prompt Engineering, Embeddings, Agentic AI (MCP Integration), LLM Evaluation & Hallucination Detection
- **Automation & DevOps:** Selenium WebDriver, Playwright, Rest Assured, Jenkins, Docker, GitHub Actions, Git, Gradle, Maven
- **Cloud & Databases:** AWS, Teradata, DB2, MongoDB, SQL Server

Work Experience

March 2022 – Present | Director / Senior Manager – Morgan Stanley, Mumbai, Maharashtra

- Owned end-to-end engineering delivery for Wealth Management Client Reporting ecosystem, leading critical platforms including Statements, Confirmations & Client Correspondence across globally distributed teams (India and North America).
- Conceptualized and architected a Generative AI-led validation platform, leveraging Python (FastAPI) and Spring Boot microservices for large-scale PDF processing (pdfminer, pypdf, pdfbox), complemented by a React-based interface for intelligent validation workflows.
- Architected an **Agentic AI–driven QA automation** workflow using **Model Context Protocol (MCP)** to integrate Jira and GitHub—autonomously analyzing story quality, validating code alignment, and generating BDD Gherkin test cases for direct upload to Jira Xray—reducing manual triage effort by ~30% and streamlining the QA lifecycle.
- Delivered step-change in validation accuracy by reducing false positives by ~80%, improving document quality assurance at scale.
- Strengthened operational effectiveness by optimizing team structures, improving resource alignment, and fostering a performance-driven, continuous improvement culture across cross-functional teams.

March 2018 – November 2021 | SDET (Test Analyst) – Infosys, Pune

- Designed and implemented a BDD-driven automation framework using Cucumber, enabling unified UI and API testing and establishing consistency in test practices across teams.
- Executed complex data validation workflows in MongoDB using Parasoft SOATest and Python scripting to ensure data integrity across systems.
- Partnered with development teams to support deployment planning and environment readiness across Dev, QA, Staging, and Production landscapes.

ǁ Early Career

November 2013 - March 2018 | Test Engineer - Mindtree, Pune

March 2009 - August 2010 | Transaction Analyst - Mphasis, Pune

ǁ Education

Master of Science, Computer Science, Scaler Neovarsity, Mumbai, India, Pursuing

- An EU-accredited program specializing in Software Engineering and AI/ML.

Bachelor of Engineering, Computer Science & Engineering, Swami Ramanand Teerth Marathwada University, Maharashtra, 2013

ǁ Patents & Certifications

- **U.S. Patent:** Innovative disclosure document evaluation and compliance system and method.
- **AWS Certified Solutions Architect Associate** (Issued Jan 2021 | Expires Jan 2024)
- **Professional Scrum Master I (PSM I)**, Scrum.org
- **ISTQB Foundation Level Tester**
